

Word Chain

Each player should print out a grid. Designate a grid to play; each player will each create words with the letters from the same grid. The letters of each word must touch each other (from any direction) and must be able to connect in the right order to spell the word. Each individual letter can be used only once in the word. Proper nouns are not allowed.

Set a timer for three minutes, and start the game. Stop when time runs out. Take turns reading your word; if any other player has the same word, all cross that word off their lists. Any remaining unique words are scored as follows: two or three letters: one point; four letters: two points; five letters: three points; six letters: four points; seven letters: six points; eight or more letters: eight points
